How much does it cost?

The following table shows the fees and expenses you could pay to invest in or redeem units of the fund.

1. Sales charges

Sales charge option	What you pay	How it works
Constellation series FEL option	There is no fee to invest or redeem units.	•You and your advisor will agree on an advisory and management services fee (AMS) of between 0.50 – 1.25%. The AMS fee is deducted from your policy every month.

2. Ongoing expenses

The fund expense ratio (FER) is the sum of the management expense ratio (MER) and the trading expense ratio (TER) and is payable from the assets of the segregated fund. You don't pay these directly, but they will reduce the return on your investment.

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee.

The TER includes the trading commissions and other portfolio transaction costs.

For Constellation series, you will pay for the advisor's services directly through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%. This fee reduces the value of your investment.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER, TER or FER. For details about how the guarantees work, see your contract and information folder.
