### How much does it cost?

#### 2. Ongoing expenses

The fund expense ratio (FER) is the sum of the management expense ratio (MER) and the trading expense ratio (TER) and is payable from the assets of the segregated fund. You don't pay these directly, but they will reduce the return on your investment.

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Estate Protection standard series, the MER also includes a fee that is paid to your advisor for the services and advice provided to you.

The TER includes the trading commissions and other portfolio transaction costs.

For Estate Protection Partner series, you will pay for the advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%. This fee reduces the return you get on your investment.

For details about how the guarantee works, see your contract and information folder.
