The Canada Life Assurance Company is the sole issuer of the individual variable annuity policy described in the information folder.

This fund facts booklet forms part of the information folder. Both the information folder and fund facts booklet must be received.

Any part of your contribution allocated to a segregated fund is invested at the risk of the policyowner and may increase or decrease in value.

Fund Facts

This fund facts booklet, which forms part of the Canada Life Segregated Fund Policies information folder, contains individual fund facts for the segregated funds available under the individual variable annuity policy. You can choose to invest in one or more of the funds available in this booklet.

The individual *fund facts* describe the key features of each segregated fund including its risk level, past performance, suitability, guarantees, and what fees and charges may apply.

The individual *fund facts* is not complete without the following description of *What if I change my mind?* and *For more information*.

What if I change my mind?

You can change your mind and cancel the segregated fund policy, the initial pre-authorized chequing premium or any lump-sum premium you apply to the policy by telling us in writing within two business days of the earlier of the date you received confirmation of the transaction or five business days after it was mailed to you.

Your cancellation request has to be in writing, which can include email, fax or letter. The amount returned will be the lesser of the amount of the premium being cancelled or the value of the applicable units acquired on the day we process your request. The amount returned only applies to the specific transaction and will include a refund of any sales charges or other fees you paid.

For more information

The *Fund Facts* may not contain all the information you need. Please read the contract and the information folder or you may contact us at:

Investment Management Fee Rebate

An investment management fee rebate applies automatically once certain conditions are met. The eligibility criteria depends on the series you hold – Standard series, Partner series, Preferred series 1 or Preferred partner series – and is shown below.

When you are eligible, you will receive investment management fee rebates. Fee rebates will be applied if they exceed a minimum threshold as set out in our then-current administrative rules. If the rebate amount is below the threshold, the rebate will continue to accrue until the next rebate payment date.

The rebate will be calculated daily on the investment management fee and allocated to each applicable segregated fund as additional units at the end of each quarter, or when a full redemption or switch occurs. It will not be paid to you in cash and does not include a rebate to the taxes collected and remitted to the government. For more information see *Income Tax Considerations* in the *Information Folder*. Where the additional units are allocated to a deferred sales charge option or low-load deferred sales charge option, you will not have to pay a redemption charge when redeeming these units in the future. The allocation of additional units with the rebate will not increase the maturity or death benefit guarantees, or the values under the lifetime income option.

We may increase or decrease the amounts shown below, change what qualifies as eligible holdings or otherwise modify or eliminate the application of investment management fee rebates, at our sole discretion and without notice to you.

The following sections set out the criteria for each of the series.

Standard series and Partner series

For the Standard series and Partner series, to qualify for an investment management fee rebate, you must hold over \$100,000 in eligible holdings. For this rebate, eligible holdings must have the same individual as the primary policyowner and can include jointly owned policies (between you, your spouse, parents and/or children residing at the same address). Joint policies are only included once the necessary consents have been obtained in accordance with our then-current administrative practices. Joint policies can only be used once for aggregation purposes. Ask your financial security advisor for details. If we determine that you are eligible for an investment management fee rebate, we will calculate it according to the procedures set out in our then-current administration rules. The current procedure is described below. First, we will calculate the value of all of your eligible holdings. We will then calculate what percentage of the value of your eligible holdings are within each of the following tiers:

Tier	Includes this portion of your eligible holdings
1	The first \$100,000 (i.e., the value from \$0 to \$100,000)
2	The remaining value (i.e., the value over \$100,000)

Finally, for each fund you hold, we will determine the applicable rebate to the investment management fee. For each tier we will multiply the percentage of the daily value of your eligible holdings within that tier by the daily equivalent of the rebate to the investment management fee in the table below that is applicable to that tier for the funds you hold. The investment management fee rebate equals the sum of these amounts.

Fund	Total Eligible Holdings Market Value Tier 1 (less than \$100,000)	Total Eligible Holdings Market Value Tier 2 (equal to or greater than \$100,000)
All funds (unless otherwise noted below)	nil	0.20%
Short-Term Bond	nil	0.10%
Money Market	nil	nil

For example:

Suppose that you hold the following segregated funds:

Fund	Market value (\$)
Money Market	40,000
Short-Term Bond	80,000
Canadian Premier Balanced	280,000
Total eligible holdings assets	400,000

In this case, the value of your holdings would be allocated to the tiers as follows:

Tier	Allocation	% of Total
1	\$100,000	25%
2	\$300,000	75%
Total	\$400,000	100%

The 25% of your total eligible holdings that are in tier 1 do not contribute to your investment management fee rate rebate. The 75% of your total eligible holdings that are in tier 2 determine your investment management fee rate rebate as follows:

Fund	Tier 2 % of Total Eligible Holdings (A)	Tier 2 Investment Management Fee Rate Rebate (B)	Investment Management Fee Rate Rebate (C) = (A) x (B)
Money Market	75%	nil	nil
Short-Term Bond	75%	0.10%	0.075%
Canadian Premier Balanced	75%	0.20%	0.15%

At the end of the quarter, if the amount of the rebate is greater than the minimum threshold it will be automatically allocated in additional units of each of the segregated funds.

Preferred series 1 and Preferred partner series

For the Preferred series 1 and Preferred partner series, to qualify for the investment management fee rebate you must hold at least \$1,000,000 in one or more approved investment products (“eligible product”). Eligible products can include either this policy or other approved investment products. Ask your financial security advisor for details. Eligible products must be held as follows (collectively referred to as “total holdings”):

- In your name;
- In your spouse’s name;
- In joint names between you and your spouse;
- In the name of or in trust for dependent children (under the age of 25 and living in the same household as you);
- In your parent’s name (when living in the same household as you); or
- In a corporate name if you own more than 50 per cent of the voting shares of the corporation

The amount of the investment management fee rebates are based on bands, as set out below.

Fund	Total Holdings					
	Band 1 \$0 - \$499,999	Band 2 \$500,000 - \$999,999	Band 3 \$1,000,000 - \$2,499,999	Band 4 \$2,500,000 - \$4,999,999	Band 5 \$5,000,0000 - \$9,999,999	Band 6 \$10,000,000+
All funds (unless otherwise noted below)	nil	nil	nil	0.05%	0.10%	0.20%
Mortgage	nil	nil	nil	0.05%	0.10%	0.10%
Money Market Fund and Fixed Income funds (see investment management fee table above) other than Mortgage	nil	nil	0.05%	0.10%	0.15%	0.15%

For example:

Suppose that you hold the following segregated funds:

Fund	Total Holdings (\$)
Canadian Core Bond	1,000,000
Conservative Portfolio	500,000
Total household assets	1,500,000

In this case, your rebate would be based on Band 3 as follows:

Fund	Rebate rate (%)
Canadian Core Bond	0.05
Conservative Portfolio	nil

At the end of the quarter the amount of the rebate will be automatically allocated in additional units of each of the segregated funds.

Another example:

Suppose that you hold the following segregated funds:

Fund	Total Holdings (\$)
Canadian Core Bond	1,000,000
Conservative Portfolio	500,000
Canadian Growth	2,000,000
Total household assets	3,500,000

In this case, your rebate would be based on Band 4 as follows:

Fund	Rebate rate (%)
Canadian Core Bond	0.10
Conservative Portfolio	0.05
Canadian Growth	0.05

At the end of the quarter the amount of the rebate will be automatically allocated in additional units of each of the segregated funds.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term, wants exposure to multi-managers in one fund with a target of no more than 25 per cent invested in equities and is comfortable with low risk.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,186.35 on December 31, 2022. This works out to an average of 1.72% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 8 years and down in value 2 years.

How risky is it?

The risk rating for this fund is **Low**.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

3. Other fees

You may have to pay other fees when you redeem or switch units of the fund.

Fee	What you pay
Short-term trading fee	Up to 2% of the value of units you redeem or switch within 90 days of investing in the fund.
Switch fee	<ul style="list-style-type: none">•You may make up to 12 free switches in each calendar year and after that you may be charged a fee.•You may be charged up to 5% of the value of the units you switch to the Standard series FEL or Partner series FEL options or up to 2% of the value of the units you switch to the Preferred series 1 FEL or Preferred partner series FEL options.

What if I change my mind?

You can change your mind and cancel the segregated fund policy, the initial pre-authorized chequing premium or any lump-sum premium you apply to the policy by telling us in writing within two business days of the earlier of the date you received confirmation of the transaction or five business days after it is mailed to you.

Your cancellation request has to be in writing, which can include email or letter. The amount returned will be the lesser of the amount of the premium being cancelled or the value of the applicable units acquired on the day we process your request. The amount returned only applies to the specific transaction and will include a refund of any sales charges or other fees you paid.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term, wants exposure to multi-managers in one fund with a target of no more than 40 per cent invested in fixed income and is comfortable with low to moderate risk.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,442.71 on December 31, 2022. This works out to an average of 3.73% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 8 years and down in value 2 years.

How risky is it?

The risk rating for this fund is *Low to moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

A person who is investing for the medium to longer term, wants fixed income and equity funds in one fund, with a target of no more than 45 per cent invested in equities and is comfortable with low to moderate risk.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,359.58 on December 31, 2022. This works out to an average of 3.12% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 8 years and down in value 2 years.

How risky is it?

The risk rating for this fund is *Low to moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term, wants fixed income and equity funds in one fund, with a target of no more than 45 per cent invested in fixed income and is comfortable with low to moderate risk.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,463.08 on December 31, 2022. This works out to an average of 3.88% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 7 years and down in value 3 years.

How risky is it?

The risk rating for this fund is *Low to moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term, wants exposure to multi-managers in one fund with a target of 100 per cent invested in fixed income and is comfortable with low risk.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$984.97 on December 31, 2022. This works out to an average of -0.15% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 6 years and down in value 4 years.

How risky is it?

The risk rating for this fund is *Low*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term and seeking potential for interest income in their portfolio and is comfortable with low risk. Since the fund invests in bonds, its value is affected by changes in interest rates.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$994.06 on December 31, 2022. This works out to an average of -0.06% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 6 years and down in value 4 years.

How risky is it?

The risk rating for this fund is *Low*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the short to medium term and seeking potential for interest income in their portfolio and is comfortable with low risk. Since the fund invests in bonds, its value is affected by changes in interest rates.

How has the fund performed?

This section tells you how the fund has performed over the past 9 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on July 8, 2013 would have \$1,004.38 on December 31, 2022. This works out to an average of 0.05% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 9 years. In the past 9 years, the fund was up in value 5 years and down in value 4 years.

How risky is it?

The risk rating for this fund is *Low*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term and seeking potential for interest income in their portfolio and is comfortable with low risk. Since the fund invests in bonds, its value is affected by changes in interest rates.

How has the fund performed?

This section tells you how the fund has performed over the past 9 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on July 8, 2013 would have \$1,031.46 on December 31, 2022. This works out to an average of 0.33% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 9 years. In the past 9 years, the fund was up in value 6 years and down in value 3 years.

How risky is it?

The risk rating for this fund is **Low**.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term and seeking potential for interest income in their portfolio and is comfortable with low to moderate risk. Since the fund invests in bonds, its value is affected by changes in interest rates.

Notes

In September 2019 Putnam Investments Canada ULC assumed portfolio management responsibilities from Mackenzie Investments. The performance prior to that date was achieved under the previous investment manager. No other changes were made to the segregated fund.

How has the fund performed?

This section tells you how the fund has performed over the past 9 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on July 8, 2013 would have \$1,140.47 on December 31, 2022. This works out to an average of 1.40% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 9 years. In the past 9 years, the fund was up in value 6 years and down in value 3 years.

How risky is it?

The risk rating for this fund is *Low to moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term and seeking exposure to Canadian bonds and Canadian and foreign stocks and is comfortable with low risk. Since the fund invests in stocks and bonds its value is affected by changes in interest rates and by stock prices, which can rise and fall in a short period of time.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,219.21 on December 31, 2022. This works out to an average of 2.00% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 7 years and down in value 3 years.

How risky is it?

The risk rating for this fund is **Low**.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Investment segmentation

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the medium to longer term and seeking exposure to bonds and Canadian and foreign stocks and is comfortable with low to moderate risk. Since the fund invests in stocks and bonds its value is affected by changes in interest rates and by stock prices, which can rise and fall in a short period of time.

Notes

The Strategic Income fund is no longer available for policies with the lifetime income benefit (LIB) option. Existing premiums can remain in the fund unless you decide to switch to a LIB eligible fund. No other changes were made to the segregated fund.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,485.97 on December 31, 2022. This works out to an average of 4.04% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 8 years and down in value 2 years.

How risky is it?

The risk rating for this fund is *Low to moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Effective November 4th, 2020 the lifetime income benefit (LIB) option is no longer allowed to be added to new or existing segregated fund policies, and no subsequent contributions can be made to policies with the LIB option as of this date.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who desires to invest in a portfolio that follows a responsible approach to investing, seeking income and long-term capital, over the medium to longer term, with exposure to global bonds and stocks and is comfortable with low risk. Since the Fund invests in stocks and bonds its value is affected by changes in interest rates and by stock prices, which can rise and fall in a short period of time.

Notes

In November 2021 JP Morgan Asset Management (Canada) Inc. assumed portfolio management responsibilities from Sentry Investments. In November 2016 Sentry Investments Inc. assumed portfolio management responsibilities from AGF Investments Inc. and the investment objective changed from investing primarily in Canadian fixed income securities and stocks to investing primarily in fixed income securities and stocks anywhere in the world. The performance prior to the above dates were achieved under previous managers and/or investment objective.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,378.44 on December 31, 2022. This works out to an average of 3.26% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 7 years and down in value 3 years.

How risky is it?

The risk rating for this fund is **Low**.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

Notes

In November 2016 Foyston, Gordon & Payne Inc. (FGP) assumed portfolio management responsibilities from Invesco Canada Ltd. The performance before that date was achieved under the previous investment manager. No other changes were made to the segregated fund.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,425.53 on December 31, 2022. This works out to an average of 3.61% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 6 years and down in value 4 years.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Guarantee policy	Standard series: FEL, DSC and LSC options	Preferred series 1: FEL, DSC and LSC options	Partner series: FEL option	Preferred partner series: FEL option	Death benefit guarantee reset option (%)	Maturity guarantee reset option (%)	Lifetime income benefit fee (%)

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking dividend income along with the growth potential of stocks and is comfortable with moderate risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,901.74 on December 31, 2022. This works out to an average of 6.64% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 6 years and down in value 4 years.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term and seeking the potential for long-term growth by investing in a portfolio of Canadian real estate properties and are comfortable with low to moderate risk due to the ups and downs of the real estate market. Redemptions may be suspended during any period that the segregated fund does not have sufficient cash or readily marketable securities to meet requests for redemptions. **This fund should be considered as a long-term investment and is not suitable for a person who may need to quickly convert their holdings to cash.**

Notes

Over the past five years, the Real Estate fund has bought \$578 million worth of real property and has sold \$513 million worth.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,488.47 on December 31, 2022. This works out to an average of 4.06% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 9 years and down in value 1 year.

How risky is it?

The risk rating for this fund is *Low to moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, wants exposure to multi-managers in one fund with a target of 100 per cent invested in foreign equities and is comfortable with moderate risk.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$2,058.04 on December 31, 2022. This works out to an average of 7.48% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 8 years and down in value 2 years.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking the growth potential of foreign stocks and is comfortable with moderate risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$2,321.06 on December 31, 2022. This works out to an average of 8.78% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 8 years and down in value 2 years.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking the growth potential of U.S. stocks and is comfortable with moderate risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$3,183.42 on December 31, 2022. This works out to an average of 12.28% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 7 years and down in value 3 years.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking growth potential of U.S. stocks and is comfortable with moderate risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

How has the fund performed?

This section tells you how the fund has performed over the past 7 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on January 12, 2015 would have \$1,937.50 on December 31, 2022. This works out to an average of 8.66% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 7 years. In the past 7 years, the fund was up in value 6 years and down in value 1 year.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking the growth potential of foreign stocks and is comfortable with moderate risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

Notes

In September 2014 Putnam Investments assumed portfolio management responsibilities from UBS Global Asset Management (Canada) Co. The performance before that date was achieved under the previous investment manager. No other changes were made to the segregated fund.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,671.08 on December 31, 2022. This works out to an average of 5.27% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 7 years and down in value 3 years.

How risky is it?

The risk rating for this fund is *Moderate*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes the insurance cost for the guarantee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking the growth potential of Asian and Pacific Rim companies and is comfortable with moderate to high risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

Notes

Effective October 2023, this fund's risk rating has changed from "High" to "Moderate to high". In October 2015 Canada Life Asset Management Limited assumed portfolio management responsibilities from AGF Investments Inc. The performance before that date was achieved under the previous investment manager. No other changes were made to the segregated fund.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a policyowner who chose the 75/75 guarantee policy and Standard series option. Returns are after the MER has been deducted.

It's important to note that this doesn't tell you how a Standard series option will perform in the future. Also, your actual return will depend on the guarantee policy and sales charge option you choose and your personal tax situation.

Average return

A person who invested \$1,000 in a Standard series option on December 31, 2012 would have \$1,497.90 on December 31, 2022. This works out to an average of 4.12% a year.

Year-by-year returns (%)

This chart shows how a Standard series option has performed in each of the past 10 years. In the past 10 years, the fund was up in value 6 years and down in value 4 years.

How risky is it?

The risk rating for this fund is *Moderate to high*.

The value of your investments can go down. Please see the *Fund risks* section of the information folder for further details.

The AMS fee is deducted from your policy every month.
Preferred partner series FEL option	Up to 2% of the amount you invest.	

2. Ongoing expenses

The MER includes the management fee and operating expenses of the fund as well as the insurance cost for the guarantee. For Standard series and Preferred series 1, the MER also includes a fee that is paid to your financial security advisor for the services and advice provided to you. You don't pay the MER directly but it will reduce the return on your investment. For Partner series and Preferred partner series, you will pay for the financial security advisor's services through the redemption of units from your policy, known as an AMS fee. This fee is negotiable and ranges from 0.50-1.25%.

Available additional guarantee options are subject to the following fees. You have to pay for these as set out below and this cost isn't included in the MER. For details about how the guarantees work, please see the applicable section of your information folder and contract.

Guarantee policy	Standard series: FEL, DSC and LSC options	Preferred series 1: FEL, DSC and LSC options	Partner series: FEL option	Preferred partner series: FEL option	Death benefit guarantee reset option (%)	Maturity guarantee reset option (%)	Lifetime income benefit fee (%)

What if I change my mind?

You can change your mind and cancel the segregated fund policy, the initial pre-authorized chequing premium or any lump-sum premium you apply to the policy by telling us in writing within two business days of the earlier of the date you received confirmation of the transaction or five business days after it is mailed to you.

Your cancellation request has to be in writing, which can include email or letter. The amount returned will be the lesser of the amount of the premium being cancelled or the value of the applicable units acquired on the day we process your request. The amount returned only applies to the specific transaction and will include a refund of any sales charges or other fees you paid.
